*To the FOURTEENTH EDITION.*

---

THE Proprietor of Lieutenant Colonel Paterson's Book of the Roads, which has always maintained a high estimation in the Public opinion, has now the honour of presenting a New Edition, being the Fourteenth ; and he flatters himself that it will be received with increased approbation, from the pains which have been taken to render it more convenient and complete.

The old Friends of this useful Work will perceive, that the whole is arranged upon a new Plan ; by devoting one column, in each page, to the Description of the Roads and Distances ; and the other, to the Seats and Topographical History : and this is so contrived, that, as the route continues, every object or observation relating to it shall be under the eye in the same page.—They will also find, that the Book is increased considerably, by New Matter, as well as by new Roads ; though from the enlargement of the page a very small addition is made to its thickness.

A new and more comprehensive Map of the Roads has likewise been prepared, corresponding with the descriptions ; so that the Traveller may trace his route with the greater facility : and at the end of the Work is an Alphabetical Table of all the principal Towns, containing, the Rates of Postage ; the Times of the Arrival and Departure of the Mails ; the Number of Houses ; and the Population : the two former communicated by the Gentlemen of the Post-Office ; and the two latter from the Report presented to

Parliament. These, it is presumed, will be of importance to the Traveller, both as affording matter of curiosity, and of useful information.

The Proprietor of this Work would be wanting in gratitude, were he not to avail himself of this opportunity of returning his best thanks to those Gentlemen, who have transmitted, through the Publishers, a great number of Emendations and Improvements : to the Right Honourable the Postmaster-General, for the favour of their support, and the facilities given under their authority for the communication of New Admeasurements, &c. &c. : to Francis Freeling, Esq., Secretary to the Post-Office, for his very ready attention upon all occasions in promoting this undertaking : as also to the Gentlemen, who execute the duties of Surveyors to the Post-Office in the several Provincial Districts : namely, to George Hodgson, Esq.—Samuel Lott, Esq.—Samuel Woodcock, Esq.—Christopher Saverland, Esq.—George Western, Esq.—Barnaby Bartlett, Esq.—and Leonard Aust, Esq.—for the very material aid, which their local situations enabled them to afford : to Lieutenant Colonel Mudge, for the Altitudes of the principal Hills and Mountains, serving as Stations for the Grand Trigonometrical Survey of the Kingdom, as taken under his direction by the authority of the Board of Ordnance ; comprehending nearly all the most remarkable Eminences in Wales as well as those in England south of Westmoreland : likewise to the Honourable the Commissioners of the Stamp Office, for the List of the Inns, &c. which supply Post Horses. In short, from the assistance which the Proprietor has received from all the Offices of Government, where information could be obtained, this publication may be considered as an official production.

To the Reverend J. Symons, junior, of Whitburn, in the county of Durham, the Proprietor is obliged for the suggestion of the New Arrangement of the Roads and Seats in the same page, as now adopted ; and for the execution of it, he is indebted to his very accurate and indefatigable friend, Mr. Thomas Keith, the Editor of the last Edition ; whose engagements in his profession, as a Teacher of Geography and Mathematics, and in the superintendence of his own useful and scientific Publications, leave him but little leisure.—The Proprietor was at a loss for a competent Assistant ; and but for his patient care and perseverance, it is not probable, that the Work would ever have attained its present eminence, as the most correct and valuable performance of the kind.

### *To the FIFTEENTH EDITION.*

---

THE same plan has been pursued in this as was adopted in the former edition. Some few additions have been thrown into the appendix ; and two new routes, the one from London and the other from Bath to Exeter, communicated by a noble lord, but which did not come to hand till the Addenda were printed off, have been inserted immediately after the General Index to the Roads. The advantages of the route from London to Exeter are, that, by opening a communication between Ilminster and Honiton, nine miles are saved in distance, and the travelling is rendered more easy by passing through a line of country in which the hills are less steep. The cross road likewise from Bath to Exeter by Ilminster is several miles nearer than the old one by Bridgewater and Taun-

ton. The Table of the Altitudes of the principal Hills has been considerably enlarged through the further kind communications of Lieut.-Col. Mudge, and now contains all the stations in the trigonometrical survey. By the continued favour of the Post-Master-General, and Francis Freeling, Esq. the Secretary of the Post-Office, the Editor has been enabled to correct the Table of the Arrival and Return of the Post, and to give the time with tolerable exactness, so far at least as relates to those places which lie within the route of the mail-coaches. And, for the embellishment of the work, maps have been engraved of the Coast from Margate to Lymington, together with the Isle of Thanet, the Isle of Wight, and the country comprehending the Lakes of Cumberland, Westmorland, &c.

The attention which has been thus shown to render this edition as complete as the nature of such a work will admit, will, it is hoped, ensure to it the continued approbation and patronage of the public.

### *Explanation of the Index.*

THE plan and design of the Index, which is very comprehensive, is described at the beginning of it; but it will perhaps be more clearly understood by the following observations.

EXPLANATION.—**ABBERFORD** is in Yorkshire; has a market on Wednesdays; the direct road to it will be found at page 182; the inn which supplies post horses is the Swan; and its direct distance from London is 186 miles. Abberford will be found among the Cross Roads at page 355.

When there are more than one road leading to any place of note, the different routes are all pointed out; as, **ABERCONWAY** is in Caernarvonshire; has a market on Fridays; the inns which

supply post-horses are the Bull, the Ferry House Inn, and the Harp; the route *by Chester* is at page 153, and the distance from London is 236 miles; the route *by Denbigh* is at page 172, and the distance from London is 220 miles. There are also three roads to Aberconway which pass through Shrewsbury, and then branch off in different directions; one of them through Llanrwst measuring 238 miles, another through Oswestry 239, and the third through Wrexham 241; and these are found respectively at pages 132, 133, 134. And beside these there is a sixth route through Whitchurch, making the distance from London 224 miles; and this is laid down in page 172. There are no cross roads to or from Aberconway.

ABERGAVERNNEY is in Montmouthshire, has a market on Tuesdays; the inns which furnish post-horses are the Angel and the Greyhound; the route by Ragland is to be found at page 115, and its length is 146 miles; that by Tregare is in page 400, and the distance from London is 151. The cross roads which pass through Abergavenny are described at pages 282, 384.

### *Explanation of the Roads.*

The general plan of the different routes is explained immediately before the commencement of the road from LONDON to DOVER; but, in order to be more explicit, the following example of the road from LONDON to RYEGATE is given by way of illustration, accompanied with such observations as will, it is hoped, render the whole perfectly plain and intelligible.

The measurements, which are taken in miles, halves, and quarters of miles, are arranged in two columns; the first giving the distance from one city, town, or village, to the next; the second the number of miles from the commencement of the road; and this plan is adhered to throughout, whether the measurement be from London, as in all the direct roads, or from some noted city or town, as in the cross roads. Thus, in the foregoing example, for instance, From the *King's Head* at Lower Mitcham to the *Cock Inn* at Sutton is 3 miles; and this inn is 11 $\frac{1}{4}$  miles from London, where the measurement begins: the *Obelisk* on Banstead Downs is 1 $\frac{3}{4}$  mile from the *Cock Inn* at Sutton, and 13 miles from London.

The utility and advantage of the *Italic* type remain now to be explained.—The words in *Italic*, immediately following the town, or place, to which the measurement is directed, shew the exact

point of distance : *Thus*, from Kennington Turnpike Gate to the *Swan* on Stockwell Common is 1 mile, thence to the *Plough* on Clapham Common 1 mile, thence to the *Bell Inn* at Upper Tooting is  $2\frac{1}{4}$  miles, &c.

The other *Italic* lines point out where the roads lead to which branch off from the right and left of the main road, with the number of miles to the nearest market town, or remarkable village, &c. *Thus*, at Kennington Turnpike Gate a road turns off on the left to Croydon, which is distant from the main road  $8\frac{1}{4}$  miles ; but the traveller goes forward to Stockwell Common, where, near the Swan Inn, a road turns off on the right to Lambeth, and on the left to Croydon : the traveller still goes forward to the Plough on Clapham Common, where a road turns off on the right to Kingston, which is distant  $8\frac{1}{2}$  miles from the road ; the traveller pursues his journey to Upper Tooting, &c. through the whole. The cities are printed in ROMAN CAPITALS, the market towns in *ITALIC CAPITALS*, and those places which supply post-horses have an asterisk prefixed to them, as \* Sutton and \* RYEGATE in the foregoing column ; and, by turning to the General Index, the inns at Sutton will be found to be the *Cock* and *Greyhound* ; and at Ryegate, the *Swan* and *White Hart*.

The THIRTEENTH EDITION of Colonel Paterson's Roads, was the *first book* that ever gave the *lateral distances from the main roads*, amounting to upwards of twenty thousand ; and as this was a work of very considerable trouble and attention, the Editor of Paterson was apprehensive that these distances, like many other of his labours and improvements, would be copied by some contemporary author, and published as *original*—time has shewn that his apprehensions were well founded.

These lateral distances have been particularly useful in compressing the work, and have afforded an opportunity of giving the road to a place of note which lies a little out of a main road, so as not to interrupt the principal route. Thus from LONDON to DOVER (see pages 1, 2, and 3 of the roads) the road by lateral references is continued to CHATHAM, MILTON, and FEVERSHAM ; and of course they are not afterwards repeated. These

places are printed like the rest ; but the figures of distances are dropped short. This plan, which is peculiar to the new editions of Paterson's Roads, is extended to the Cross Roads. Thus if the traveller turn to page 288, where the road from BATH to CHELTENHAM is given, he will find not only the route to Cheltenham, but to *CHIPPING SODBURY, TETBURY, MINCHINGHAMPTON*, and GLOCESTER, which lie out of the main road.

It may be necessary to remark, that the roads which are pointed out by the initials *r.* and *l.*, as branching to the right and left, are, in general, turnpike roads ; but the distinction is not expressed ; and, as travellers are frequently deceived, by the natural expectation that turnpikes should be good roads, it is therefore recommended to make previous enquiry into the state of them ; as many of the cross turnpike roads are, in winter time, and often after wet weather, rendered almost impassable.

### III.

#### *Arrangement of the Roads, with the Standards from which they are measured.*

I. The KENT Roads are measured from the *Surrey Side of London Bridge*, through Kent Street.

II. The PORTSMOUTH Road, and those branching from it, are measured from the *Stones' End in the Borough*, near the King's Bench, according to the mile-stones ; but our distances are given from the Surrey Side of London Bridge, through Newington.

III. The ISLE OF WIGHT Roads are measured from *Cowes*, and the distances given in the General Index are from London through Portsmouth, taking the distance from London to Cowes through Portsmouth at  $84\frac{1}{4}$  miles.

IV. The CROYDON, RYEGATE, EPSOM, and BRIGHTHELMSTONE Roads, are measured from the *Surrey Side of Westminster Bridge*, and from the Standard in Cornhill. The mile-stones are generally numbered from both these places. The distances from

Cornhill are exactly *one* mile more than those from Westminster Bridge. Our distances are reckoned from Westminster Bridge.

V. The WINCHESTER and SOUTHAMPTON, DORSETSHIRE, DEVONSHIRE, CORNWALL, WILTSHIRE, SOMERSETSHIRE, and all the Roads in the south-west of the kingdom, are measured from *Hyde Park Corner* through Brentford.

VI. The UXBRIDGE, EDGEWARE, BIRMINGHAM, SHREWSBURY, and most of the Roads in the western part of the kingdom, are chiefly measured from *Tyburn Turnpike* at the top of Oxford Street.

☞ The HIGHGATE and HAMPSTEAD Roads are measured from Holborn Bars, near Gray's Inn Lane, and from the bottom of Oxford Street, where St. Giles's Pound formerly stood. A stone in the front of one of the houses in St. Giles's, facing Oxford Street, with an inscription, points out the spot.

VII. The BARNET Road, and all the Roads in the north, and north-west of the kingdom, are measured from the place where *Hicks's Hall* formerly stood; viz. at the end of St. John's Lane, St. John's Street, West Smithfield. A stone in the front of one of the houses has an inscription pointing out the spot.

VIII. The WARE and HUNTINGDON Roads, with the branches therefrom, are measured from *Shoreditch Church*; but the mile-stones are numbered from this standard no farther northward than Alconbury Hill, where these Roads join the Great North road, as measured from Hicks's Hall.

IX. The ESSEX Roads are measured from *Whitechapel Church*.

#### IV.

#### *Directions for finding the Roads.*

I. The DIRECT ROADS.—To find the road from LONDON to any city, town, or remarkable village, in England or Wales, look for the name of the place in the GENERAL INDEX TO THE ROADS,

and the figures to the right hand thereof, refer to the page in which is that part of the road containing the place looked for : Thus, from LONDON to DURHAM, the Index refers you to page 223, where you find Durham with its distance from London, &c. though the description of the road in which it is situated (being that from London to Edinburgh) begins in page 148, and ends in page 225. Thus the road between Durham and Boroughbridge is contained in pages 223 and 222 ; between Boroughbridge and Barnet, in pages 183, 182, 181, 180, 179, and 178 ; and between Barnet and London, in page 148 ; hence the whole route from Durham to London, or from London to Durham, is traced. To avoid every possibility of mistake we shall give a similar instance where the distance is shorter, and consequently where the road is divided into fewer parts. Thus to find the road from LONDON to TILBURY FORT in Essex, by Romford, the Index refers you to page 268, where (and at page 267) you will find the road in the following form :

*To ROMFORD, Essex, p. 265	—	11 $\frac{3}{4}$
In the middle of the town, r. to		
Hornchurch, P. O. - - - -	2 $\frac{1}{4}$	14
Upminster, P. O. - - - -	1 $\frac{1}{2}$	15 $\frac{1}{2}$
r. to Corbet's Tye, P. O. - -	1	16 $\frac{1}{2}$
$\frac{3}{4}$ m. farther, l. to North Ockendon, P. O. 1 m.; thence to South Ockendon 1 $\frac{1}{4}$ m.; or r. to		
South Ockendon, P. O. - - -	3 $\frac{1}{4}$	19 $\frac{3}{4}$
$\frac{1}{2}$ m. before Stifford, r. to London through Dagenham 20 $\frac{1}{4}$ m.		
Stifford, P. O. Dog and Partridge Forward to Horndon on the Hill ; r. to road to Gray's Thurrock. London to Gray's Thurrock 24 m.	2	21 $\frac{3}{4}$
Little Thurrock - - - - -	1	23 $\frac{3}{4}$
Chadwell, T. G. - - - - -	1 $\frac{1}{2}$	26 $\frac{1}{4}$
Forward to Horndon on the Hill, r. to		
West Tilbury, T. G. - - - -	2	26 $\frac{3}{4}$
Tilbury Fort, Ferry House - -	1 $\frac{1}{2}$	28 $\frac{1}{4}$

By which it appears that you are referred to page 265 for this road as far as Romford (the last remarkable place on the great road, or the last place you pass through before the road turns off) ; thence the remainder of the road to Tilbury Fort is given, after the above form, in pages 267 and 268, to which you are directed by the In-

dex. These references are made use of, in order to prevent the numberless repetitions, which otherwise would unavoidably occur in a work of this kind, and swell it to a very inconvenient size.

II. The CROSS ROADS branching from principal places are arranged alphabetically, as BATH to BRIDGEWATER; BATH to BRIDPORT; BATH to CHELTENHAM; BATH to CHESTER; BATH to DONCASTER, &c. In such cases the roads are easily found, even without referring to the Index: but by looking for Bath in the Index, after the word *Cross*, all the pages wherein Bath is to be found, are given, as 286, 287, 288, 289, 291, 294, 298, 300, 302, 303, 304, 305, 306; and if the desired route through Bath be not found in some one of these pages, it is not contained in the book. The same rule must be observed with respect to other places. When the route is wanted from a place of considerable note, to one of less importance, it is generally recommended to look in the Index for the place of least consequence, because it has fewer roads leading through it. Suppose the route from BATH to LEDBURY was wanted, by looking in the Index for Ledbury after the word *Cross*, it will be found at page 290, and no where else; whereas had Bath been looked for in a similar manner, it would have occurred *thirteen* times.

### *The Map.*

The Map prefixed to this Edition of the Roads has been executed with the utmost care and attention: the scale is sufficiently large to render the principal Places, and the Roads leading to them clear and distinct; the Mail Coach Roads are pointed out; and all the Roads, both Direct and Cross, have figures upon them referring to the different pages of the Book wherein they are particularly described; by which means the Map, in some measure, answers the purpose of a General Index.

To this new maps are added of the line of coast from Margate to Southampton and Lymington, together with the Isle of Thanet, the Isle of Wight, and the country comprehending the lakes of Cumberland, Lancashire, and Westmoreland.

# GENERAL INDEX

TO THE

*DIRECT AND CROSS ROADS OF ENGLAND, WALES, &c.*

COMPREHENDING

All the **CITIES**, **MARKET TOWNS**, *Boroughs*, and *Post Stages*, in the Direct and Cross Roads; together with most of the *Villages* mentioned in the Direct Roads, and their Distances from LONDON:

To which are annexed the *Inns that supply Post Horses*, carefully extracted from Papers furnished by the Honourable the Commissioners of His Majesty's STAMP OFFICE, and the Surveyors of the POST OFFICE.

 The first Column contains the Distances of the Places from LONDON: the second Column contains the Places, the Counties in which they are situated, their Market Days, the Pages wherein the Roads (both Direct and Cross) are to be found, which lead to, from, or through, the several Places, and the *Inns which supply Post Horses*.

In stating the Distances, the fractional parts are dropt where they do not amount to  $\frac{1}{4}$  of a mile: where they do, the  $\frac{1}{4}$  is added. Thus KENDAL, which in the route (p. 177) appears to be  $261\frac{1}{4}$  miles from London, is given in the Index as 262. Where the same place occurs in different routes, the difference of distance is not noted, unless the place is of some consequence, and the difference amounts to 2 miles. In all other cases the first Distance only is set down.

The Boroughs are distinguished by this mark †; the Number of Members being noted by the Number of Obelisks. The Cities are printed in ROMAN Capitals, the Market Towns in *ITALIC* Capitals, and Places which supply Post Horses have an Asterisk prefixed, as in the Roads; and where a single Inn on the Road supplies Post Horses, it is printed in *Italics*: also, where there are more than one Inn, they are inserted Alphabetically, in order to avoid the appearance of Partiality or Preference.

## EXPLANATION.

- I. The names of Cities are printed in ROMAN CAPITALS, as “ \* CANTERBURY ;” the names of Market Towns are printed in *ITALIC CAPITALS*, as, “ *ABBOTSBURY* ;” and the names of Villages, &c. are printed in small Roman, as “ Crayford.” Places which supply Post Horses have an asterisk prefixed, as “ \* Shooter’s Hill, \* ROCHESTER, \*CHATHAM, &c.,” and, where a single Inn on the road supplies Post Horses, it is printed in small *Italics*, as, “ \* *Aust Passage Inn.*”
- II. T. G. signifies Turnpike Gate, M. H. Market House, P. O. Post Office, and N. M. New Measurement. The words in *Italics*, immediately following the names of Places, shew the exact point at which the measurement terminates; as North Fleet, *Queen’s Head*, shews that the measurement is taken from London Bridge to the Queen’s Head at North Fleet: &c.
- III. The *Italic* type which occurs between the Towns, Villages, &c. on the road, points out where the roads lead to which branch off to the right and left, with the number of miles to the nearest Market Town or remarkable Village, and other useful information. The letters *r* and *l* signify the right and left of the road; thus at New Cross Turnpike Gate, the road on the right leads to Bromley, which is six miles and a quarter distant from the Turnpike Gate; at Blackheath a road turns off on the left to Woolwich through Charlton, &c. The letter *m.* following the figures is an abbreviation for Miles.
- IV. Places which lie contiguous to the road, and through which the main road does not pass, have their distances dropped short, as *MILTON*, which lies *one* mile to the left of Chalkwell; *FEVERSHAM*, *one* mile to the left of Ospringe, &c.
- V. The *first column of figures* contains the distances from one Village or Town to another, in miles, halves, and quarters; the *second* the distance from London, or from the place where the route is measured; and the eye of the Traveller is guided to *these distances* by dotted lines: so that by attending only to the figures, the dotted lines, and the places to which they are attached, the *original plan of Paterson’s Roads* will appear to be preserved.
- VI. The seats contiguous to the several places, and every observation relating to the same, will be found in the same page with the places.

*For a farther account see THE EXPLANATORY PREFACE.*

## II. GREAT AND DIRECT ROADS

MEASURED FROM THE

SURREY SIDE of LONDON BRIDGE through NEWINGTON,  
With the Roads branching from them to  
Market and Sea-Port Towns.

 From the Surrey Side of London Bridge to Vauxhall Turnpike Gate.....	M. F. P. 2 3 18
From the Surrey Side of Blackfriars Bridge to Ditto.....	2 2 8
From the Surrey Side of Westminster Bridge to Ditto.....	1 5 0
From the Stones' End in the Borough to Ditto.....	1 5 2
From the General Post Office, through the Borough, to Ditto..	2 6 38

The Mile Stones on the Portsmouth Road, as far as Sheet Bridge, are reckoned from the Stones' End (near the King's Bench), in the Borough of Southwark, which is distant from the Surrey Side of London Bridge 6 Furlongs and 16 Poles.

Beyond Sheet Bridge, the Mile Stones shew the Distance from the Standard in Cornhill, from whence the whole of this Road was formerly measured; hence the Distances in the following Route will be  $\frac{3}{4}$  of a Mile too great, as far as Sheet Bridge, for the 29th Mile Stone stands within the Town of Guildford; but beyond Sheet Bridge, they will be too little, according to the Mile Stones from the Standard in Cornhill.

The Farnham Road, beyond Guildford, is measured from the Standard in Cornhill; and the Chichester Road, from London Bridge: our Distances are all taken from London Bridge, and the addition of  $\frac{1}{2}$  a Mile will give the Distances from the General Post Office.

Chertsey has a handsome Stone Bridge  
over the Thames. Here was formerly  
a stately Abbey, in which were depo-  
sited the remains of Henry VI, which  
were afterwards removed to Windsor.  
Cowley the Poet died here in a house  
called the Porch House, now belong-  
ing to R. Clarke, Esq., Chamberlain  
of London. The Church was built  
by the Saxons about the same time  
with the Abbey, though the Abbey is  
now entirely destroyed. On St. Anne's  
Hill, in this parish, is part of a stone  
wall belonging to the Chapel of St.  
Anne, and not far from it is Monk's  
Grove, Lord Montford, near which is  
a Medicinal Spring, formerly cele-  
brated.

Poole is seated on a peninsula projecting into a capacious harbour, which branches into many creeks, and forms several small islands. The harbour will not admit very large vessels. Poole is chiefly engaged in the Newfoundland fishery, importation of deals from Norway, a commercial intercourse with America, and a coasting trade with corn. There is an oyster bank near the mouth of the harbour.

Worcester is a large handsome City,  
pleasantly situated on the banks of  
the Severn, over which is a good  
Stone Bridge. It contains nine Parish  
Churches, besides the Cathedral and  
St. Michael's. It has a manufactory  
of elegant China, and carries on a  
considerable trade in Woollen Stuffs  
and Gloves. Here Cromwell in 1651  
obtained a victory over the Scotch  
army, which had marched into En-  
gland to reinstate Charles II, before  
his escape to France. The Cathedral  
contains many Monuments of great  
antiquity. Here King John was bu-  
ried, likewise Prince Arthur, the elder  
brother of Henry VIII, &c. &c.

*York, the Eboracum of the Romans, is a very ancient city. It has always been considered as the capital of the North of England, and in point of rank the second city in the kingdom. The Cathedral of St. Peter, generally called the Minster, is reckoned the most elegant and magnificent Gothic structure in the kingdom, besides which there are seventeen Churches. York is divided into two parts by the river Ouse, over which is a fine Stone Bridge of five arches; the centre arch is eighty-one feet wide, and the river is navigable here for vessels of seventy tons burthen. The city is surrounded by a strong Wall, through which are entrances by four gates and five posterns; the Castle was built by William the Conqueror, and was formerly a place of great strength; it is now the County Prison.*

 under the management of the Lord  
 Mayor and Aldermen of the city of  
 London, for the support of Emanuel  
 Hospital, near York-street, Westmin-

 only £200 a year from the estate,  
 which was held on a lease of 195  
 years by the Bethell family. The  
 lease has now expired, and the income  
 from this village is very considerable.

have, till lately, been the only direc-

 coast; but a Light-house is now erect-

 from the basis to the summit is eighty-  
 five feet, and from the level of the  
 sea two hundred and fifty feet. The  
 Lantern contains three frames, with  
 seven large lamps, and reflectors in  
 each, making in the whole twenty-one.  
 The lights revolve, and the motion is  
 horizontal; one of the lights is red,  
 to distinguish Flamborough lights from  
 all others, and in a clear night may be  
 seen at the distance of thirty miles.

BATH to BRIGEWATER, by AXBRIDGE.

To Twyverton, Somersetshire - - - -	—	2	Bath has been famous from the time of the Romans for its Hot Springs, which are not only used as baths, but internally as a medicine; and great benefits are derived from them in gouty, paralytic, bilious, and other cases. The reputation of these waters has so much increased, that Bath has become the principal resort, next to the metropolis, for the nobility and gentry, and the constant residence of many opulent invalids, as well as of numerous votaries of pleasure.

Southampton is pleasantly situated on a gentle ascent, between the Itchin and Anton, or Test rivers. It occupies a kind of peninsula, the soil of which is a hard gravel, and the streets are always clean and dry. The chief trade of Southampton is with the islands of Jersey, Guernsey, Alderney, and Sark; several sloops are continually passing between these islands and Southampton. A Carpet and a Silk manufactory are established here, and at South Stoneham, a little distant, are Mills for manufacturing Blocks and Pumps for the navy.

Portsmouth is the most considerable harbour for Men of War, and the strongest fortified place in England. Its capacious harbour is made by a bay running up between Porsea island, in which the town is seated, and the opposite peninsula, having a narrow entrance commanded by the town and forts. The Docks, Arsenal, Storehouses, Barracks, &c. are all on an extensive scale, and kept in the most perfect order. S. W. of Portsmouth, and sheltered on the S. by the Isle of Wight is Spithead, a noted road, or anchoring place for the Men of War, when prepared for actual service.

*Heathfield Tower Hill.* A fine view of Heathfield Park, Francis Newbery, Esq. From the Tower, built by Mr. Newbery, in honour of the late Lord Heathfield, the gallant defender of Gibraltar, who formerly possessed Heathfield Park, is a most rich, beautiful, and extensive view, as well over the sea as the surrounding country. The ride from hence to Burwash is singularly beautiful, as indeed is most of the scenery of this part of Sussex, so little known. At Cade Street, Heathfield, is a Pedestal, with a suitable inscription, erected near the spot where the notorious rebel Jack Cade was killed. This insurrection took place in the year 1450, in the reign of Henry VI.; which, under a leader of higher rank and greater honour, might have produced a revolution. Jack Cade, otherwise called John Amend-all, was discovered in a garden, near this place, by Alexander Iden, Esq., then Sheriff of Kent, and, making some resistance, was killed. His body was brought to London; a reward of 1000 marks having been offered, by proclamation, to any person who brought him in, dead or alive; and his head was fixed upon London Bridge.

*Cranbrook.* Near, on r, Swift's Place, Major Austin. Cranbrook is the place where the first Woollen Manufactory was erected by those Flemings, who were encouraged to settle here by Edward III.; but that trade has, long since, been suffered to decay. In the reign of Queen Elizabeth, a beacon was set up at this place.

New Bridge - - -	2	19 $\frac{1}{4}$	Aberystwith is a noted Bathing Place, situated on Cardigan Bay, at the junction of the Ystwith and Rhediol rivers. It is governed by a Mayor, Recorder, and other inferior officers: it is pretty large and populous, but the streets are rather steep and rugged, and the houses, being chiefly built of the black slate, which the country produces, gives the whole a gloomy and cheerless aspect. Yet, the charms of the vicinity, the cheapness of accommodation, and the pleasantness and convenience of the beach, have long rendered it a favourite resort, not only for company from the neighbouring counties, but also for parties from different parts of England. Aberystwith is a place of considerable trade to Liverpool, Bristol, &c.

*Altringham* is a small Market Town, situated between the Bollin river and the Duke of Bridgewater's Canal, containing 1,692 inhabitants.

*The Duke of Bridgewater's Canal* has its commencement near Manchester, passes through Stretford, and crosses the river Mersey a little East of the road from Altringham to Manchester. It passes by Altringham, Groppenhall, Daresbury, and Preston on the Hill. Here it meets the Grand Trunk Canal, and falls into the Mersey river at Run-corn Gap, near which are ten locks, the descent to the Mersey being 84 feet. Near Stretford it runs N. W. to the Irwell river, over which it is carried by a noble aqueduct, and passes to Worseley Mill, whence it has lately been extended to Leigh. A considerable portion of this canal goes under ground, within the mountain at Worseley. The whole extent is about 40 miles.

In 1267 a Parliament was held in the castle, which enacted several laws, called the Statutes of Marlebridge. Marlborough was formerly a Roman station, which is evinced by the site of a Roman castrum, and by the Roman coins which have been here dug up. The town has often suffered by fire, and in 1690 an Act of Parliament was made to prevent the houses in it from being thatched.

Wakefield is seated on the Calder river  
over which there is an ancient Stone  
Bridge; and on this Edward IV. erected  
a Chapel in remembrance of those  
who lost their lives in the battle near  
this place, in 1460. Wakefield has a  
considerable trade in White Cloths and  
Tammies, and is inhabited by several  
gentlemen of fortune and opulent mer-  
chants.

Pontefract is situated on a rich soil, and  
is noted for its Nursery Grounds and  
Liquorice Plantations. Its Castle, now  
in ruins, has been the scene of various  
tragical events in the English history,  
particularly of the murder of the un-  
fortunate Richard II. It is governed  
by a Mayor, and sends two Members  
to Parliament.

Knottingley produces great quantities of  
Lime of a superior quality.

Turnbridge. On r, Cowick Hall, Lord  
Viscount Downe.

Lawn Head - - - -	3 $\frac{3}{4}$	7	<i>Walling Street</i> stands on the Roman road of that name, which was one of the prætorian or consular highways made by the Romans for the marching of their armies, &c. It is made of large stakes and small wood, (called <i>wattles</i> by the Saxons) woven between the stakes to keep up the earth and stones. This road is reckoned the finest of its kind in England; it begins at Dover, and runs to St. Albans, Dunstable, Towcester, Atherston, and Shrewsbury, and ends at Cardigan. In some counties it is very firm for several miles.

Wellington is a small place, though the neighbourhood abounds with Coal, Lime, and Iron. Here are two Furnaces, which are worked by one of the largest Steam Engines in the kingdom.
